

LEARNING TOGETHER #1

Kumeyaay

- A.** Think about what happens when it rains. Where does the water go after it falls from the clouds? Think about where you live, specifically. Where do the raindrops go?
1. Do they all go to the same place? What if they fall on a building or a street?
 2. What if they fall on a park or grass area?
- B.** Hundreds of years ago the area that is now National City was home to Native Americans. Specifically, the Kumeyaay people lived in this area. The Kumeyaay built villages near sources of water and lived in dome shaped homes made of branches, leaves and other brush.
1. If you lived in a Kumeyaay village in the past, think about where the rainwater would go after it fell from the clouds.
 2. How would it be different than what happens in the same area today?
- C.** Map of Kumeyaay Nation, pre 1700.
